Lake Nakuru is one of the lakes in the Rift Valley. It is located south of the city of Nakuru, in central Kenya, and is surrounded by Lake Nakuru National Park. The park was established in 1961. It started small, encompassing the famous lake and surrounding mountainous areas. It has now been expanded to include a large portion of parks.

The abundance of algae in the lake this attracts significant bird species of flamingos which are common on the shore of the lake. Some birds also thrive in this area and even the wildlife.

Arrive late morning for the game drive followed by check-in at the Lake Nakuru Lodge and lunch at the lodge. Enjoy an evening game drive in this lodge in search of rhinos, rare Rothschild giraffes, and other animal species.

Dinner and overnight at the Lake Nakuru lodge on a Full board basis.

After breakfast, we proceed to the Lake Lake Bogoria; a shallow saline lake within the Great Rift Valley lying north of the equator famously known for its hot springs, geysers, and huge amounts of blue-green algae that attract hundreds of lesser flamingos on the lake.

Lake Bogoria has over 200 hot springs and 17 geysers, some of which are still active. The lake has the highest number of geysers anywhere in Africa. <https://lakenakurulodge.com/>

Friday 25th October 2024: Masai Mara Game Reserve – Kenya

After breakfast leave for a full-day game drive with a picnic lunch at the Mara River Migration bride area. This day is spent game viewing in Kenya's finest wildlife park, the Masai Mara National Reserve. Our morning and afternoon game drives take us in search of Africa's Big Five and the plethora of other wildlife inhabiting this vast Kenyan game reserve.

Early morning Masai Mara hot air balloon safari can be arranged at extra cost.

Wherever you go in the vast Masai Mara you will see a frequent amount of wildlife such as Masai giraffes, baboons, warthogs, bat-eared foxes, grey jackals, spotted hyenas, topis, impala, hartebeests, wildebeest. Elephants, buffaloes, zebras, and hippos are also found in great numbers. It is also common to see lions either basking after a heavy meal or surveying the plains for their next meal. Cheetahs and leopards are harder to spot but reasonably common. The ultimate action here is without doubt the annual wildebeest exodus, the Great Migration, in July and August when millions of these grass eaters move north from the Serengeti in search of lush grass before turning south again in October to December. Nothing is thrilling like a bush dinner to end such an adventurous day at an extra cost.

Return in the evening for Dinner and overnight at the Lodge.
