## RECOMMENDATION

Due to the height, location and topography of these ports through which the route is developed, there is the option that one of them can be closed.

Therefore, the detailed study of a possible alternative route is recommended. It is very easy and can save time if you have studied the ground.

## IMPORTANT

You can display the full path and get a complete and detailed road book through Google Maps copying and pasting the required points and mountain pass by the same numerical order.

To those who want, the organization will provide the route track for TomTom and Garmin navigators, must provide data cable.
